

Regional Roadside Turfgrass Testing Program

(Wisconsin Department of Transportation [DOT])

This multi-state research project aims to provide participating departments of transportation with unbiased, up-to-date information about the performance of turfgrass cultivars when used on roadsides in the northern United States. This project has four objectives:

- a. Institute a multi-state roadside turfgrass testing program.
- b. Develop a data collection and reporting system that provides the most recent research results to state DOTs in a timely manner.
- c. Increase collaboration between University research programs that work on roadside turf.
- d. Demonstrate the usefulness of regional roadside turfgrass research in order to increase collaboration between Departments of Transportation in future years.
